# A new age for aviation risk management

## Osprey Atlas

Providing you a visual overview of  
aviation risk

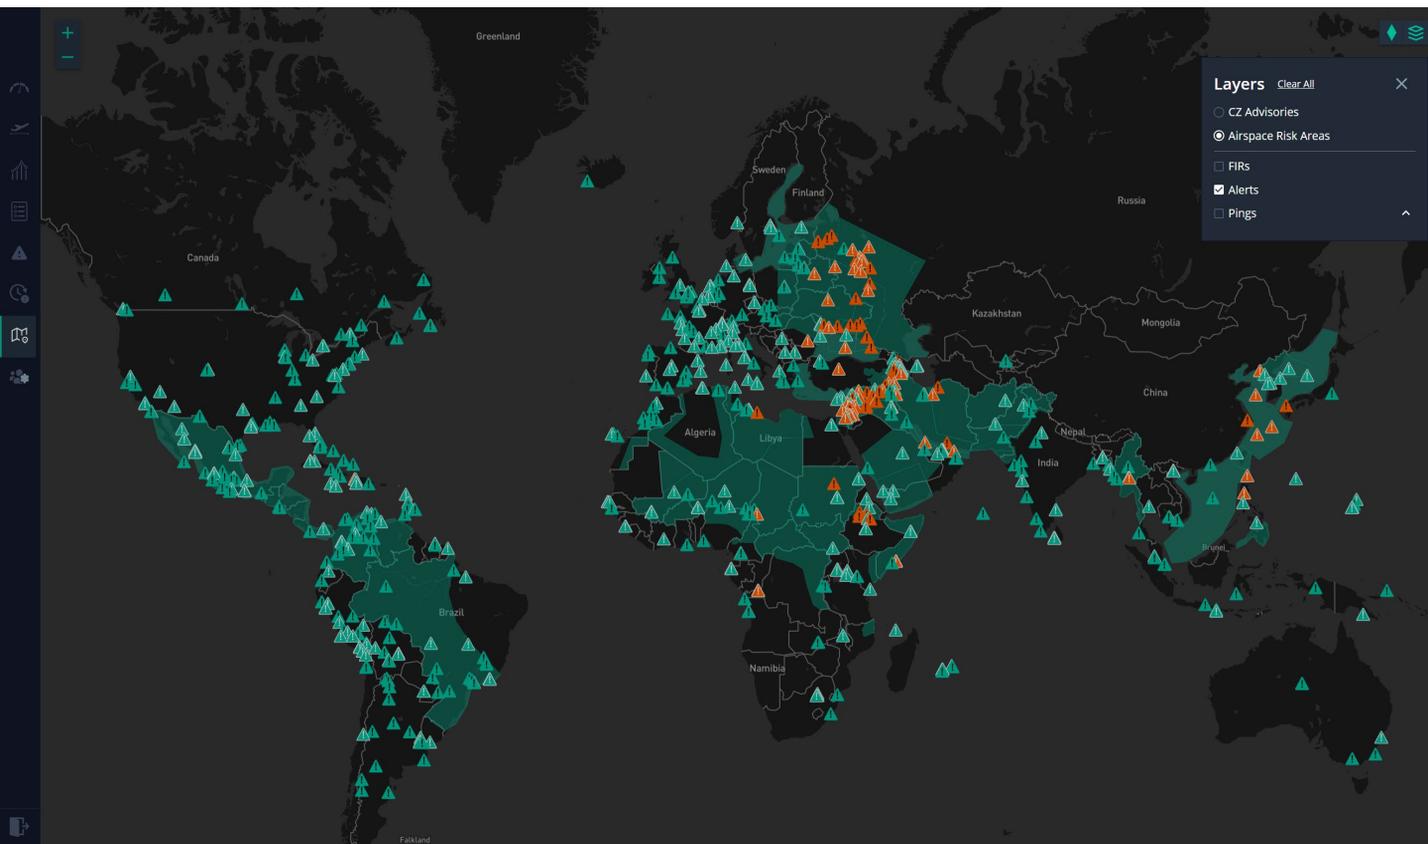

PRIVATE & CONFIDENTIAL

## Introduction

The Atlas tool enables you to visualise the aviation risk landscape. You can explore Conflict Zones advisories, navigate through our airspace risk areas and visualise the locations of our pings and alerts on the map.

### What will be covered:

- A visual overview of conflict zones and their location
- A visual overview of Airspace risk areas
- Layer: FIRs, Osprey Alerts and ping data for more of an insight on the map.

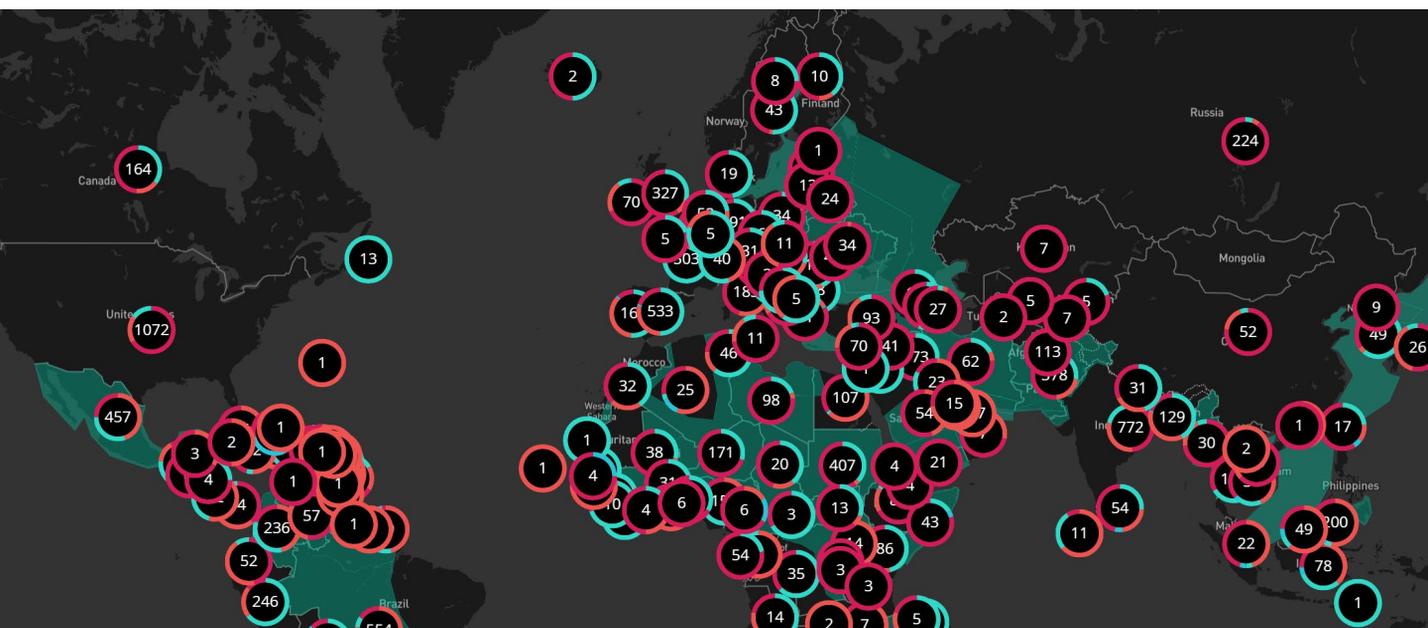

## Using Osprey Atlas

1. To navigate to the Atlas map use the Atlas Icon on the left-hand side of the screen.
2. To add layers to the map, select the layer icon in the top right of the screen.

### Selection options:

- ◆ Conflict Zone advisories and view the overall location on the map
- ◆ Airspace Risk Areas which gives you a snapshot of airspace risk – it does not give you the levels of risk however this can be seen within the reports map module.
- ◆ Layer the FIRs over the map.
- ◆ Layer Alerts to help you determine the geo-location (for legend click the Diamond in the top right).
- ◆ Layer Pings to help determine the geo-location (for legend click the Diamond in the top right).

**Top Tip: Use Atlas to get a clear visual of Social Unrest, Crime, Corruption and Aviation Security Pings against our Airspace shapes.**

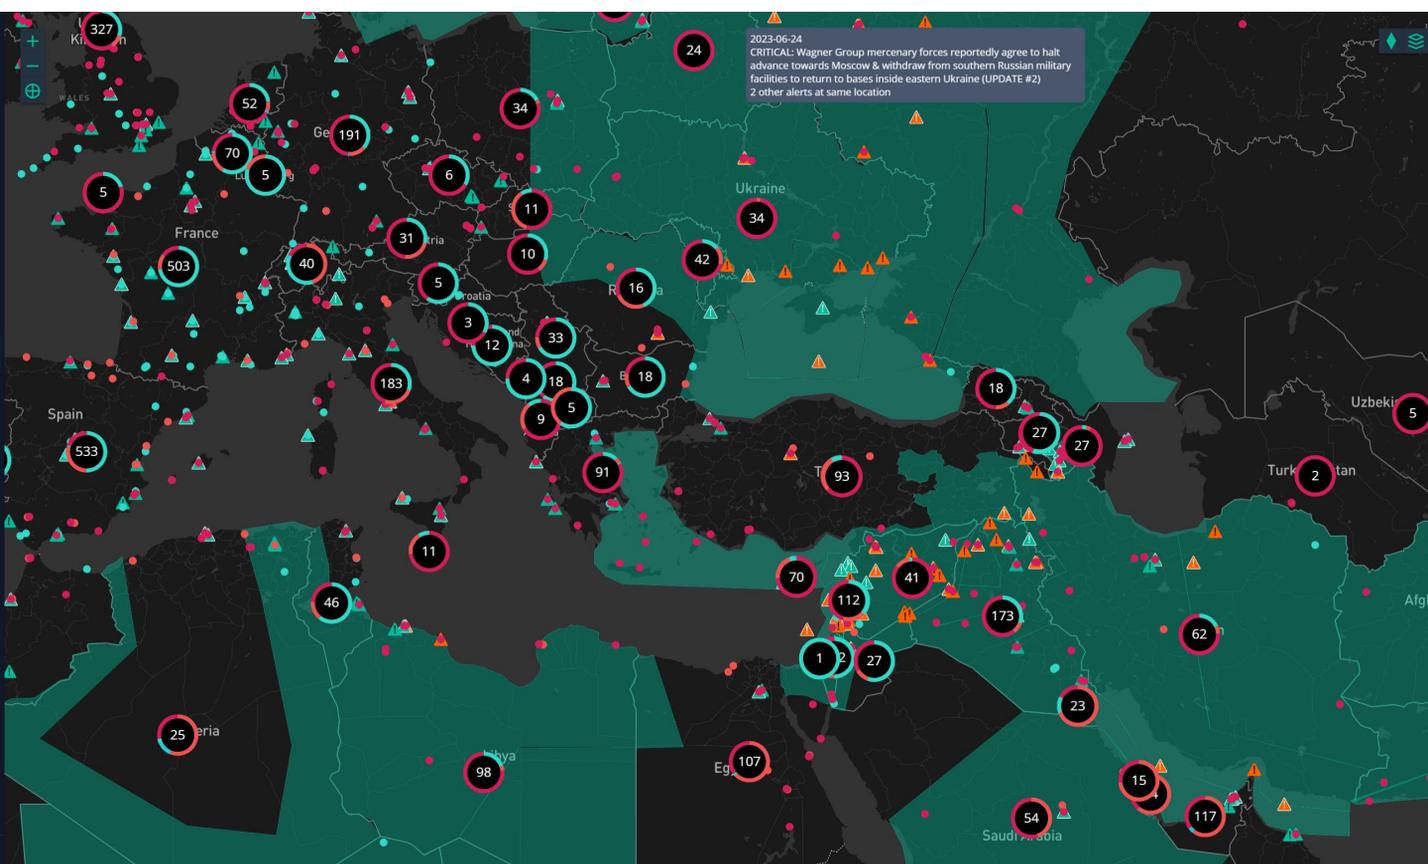

## Pings

The ping categories listed are; social unrest, crime, corruption, and aviation security. Using the drop-down menu, you can select which you want to see on the map.

Zoom into the map and hover over a single Ping of interest, it will give you a summary. For more details of the Pings and to explore all 22 categories, see the :Explore dashboard.

## Alerts

Zoom into the map and hover over an Alert of interest, it will give you the date of the Alert, type and summary. For access to our full detailed Alerts, you can use the Alerts dashboard or view them in your emails.

## Conclusion

This data visual overview enables an accurate and refined location of our Alerts and some Ping categories. Capture and incorporate this information for discussions, addressing stakeholder enquiries and gaining insights that support your decision-making processes.
